Aven's **Mighty Vue Pro** LED series magnifying lamps are in a class of their own. Featuring **adjustable color temperature (3500K—6500K)**, brightness control (6500LX), in addition to an attractive design, the Mighty Vue Pro series lamps ensures crystal clear viewing for any application. The **ESD safe coating** prevents damage to sensitive components from electrostatic discharge.

- Touch-sensitive brightness controls
- ESD safe coating dissipates electrostatic discharge
- Adjustable color temperature range: 3500K—6500K
- Large 7.5" x 6.2", 5-diopter crystal clear glass lens for distortion-free viewing
- Fully covered spring balanced arm ensures a large working range
- 360° swivel motion allows the head to be placed in any position
- Covered spring arm prevents pinching hazards
